Experience the next generation network consumption model

Let your network infrastructure scale rapidly with full transparency and control over costs.

Cisco EA & Boundless Smart Track*
Drive Enterprise Efficiency and Growth

As the speed of digital transformation accelerates, organizations require more agility and flexibility on how they invest in technology. The **Cisco Enterprise Agreement** (EA) program provides just that.

With Cisco EA, enterprises can benefit from a simplified and premium experience when buying, consuming and managing software across the Meraki suite and the Cisco portfolio.

Paired with **Boundless Smart Track***, enterprises can also get full transparency and control over what is being used under their Cisco EA*. This means complete drill-down visibility across the consumption of each network and branch, enabling seamless chargebacks across entities.

Key Benefits

Unmatched value
Get the most from your investment with access to exclusive offers.

Business agility
Scale and adapt your investments across all our solutions to best meet your changing needs.

Premium experience
Easily buy, manage and consume your software licenses.

Full transparency
Get full visibility on how resources are spent and recovered.

Centralized collaboration
End-to-end accounting and single source of truth for all stakeholders.

Get Simplicity, Predictability, Flexibility and Control

* Currently compatible with Cisco Meraki software only.

Cisco EA and Boundless Smart Track*
Meet the future of IT consumption

When used together, the Cisco EA and Boundless Smart Track* enable a consumption model that works for enterprises and partners.
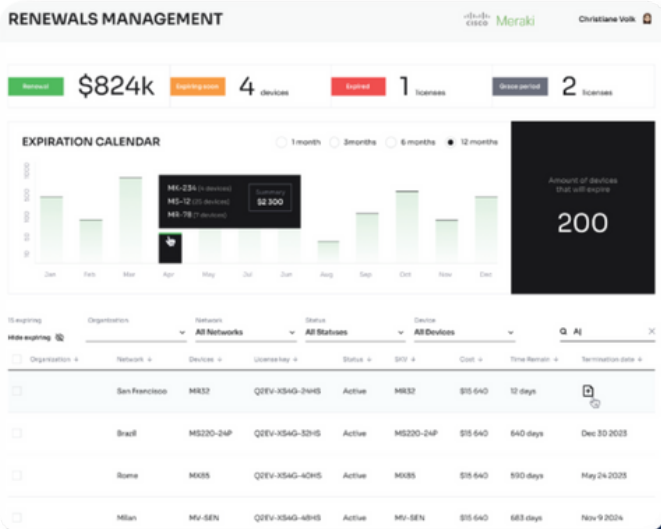

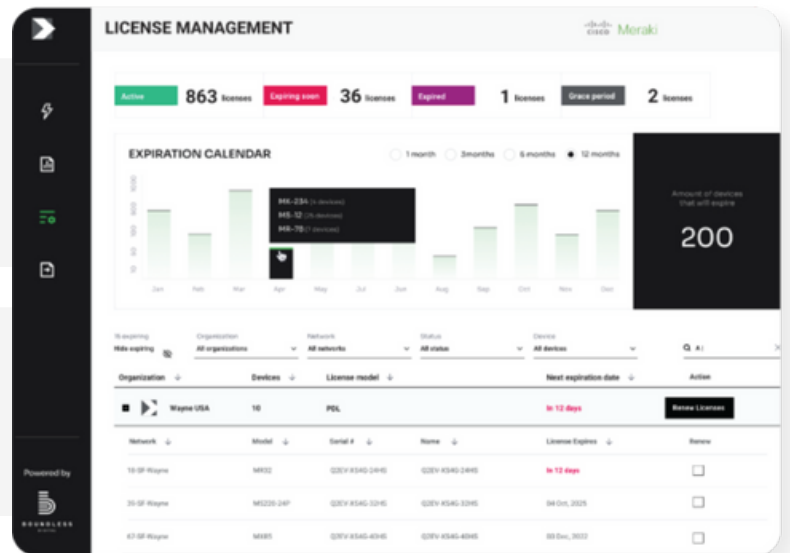

Functionalities

Better budget control
Get the most from your investment with access to exclusive offers.

More accountability over expenses
Get granular visibility over resource consumption for each individual site.

Chargeback made easy
Track costs more easily. Streamline internal chargeback and reduce the burden of year-end true-ups.

Seamless collaboration with partners
Establish a single source of truth for every stakeholder, and establish user permissions and data access based on roles.

> "Leveraging Boundless Digital and their custom Meraki EA dashboard we were able to quickly and painlessly untangle IHG's 400,000 licenses and propose a massive Meraki licensing renewal via an Enterprise Agreement that provided custom visibility and reporting to Meraki, partner, and IHG. None of this would have been possible without Boundless Digital."
>
> **– Steven Allspach, Sr. Cloud Networking Specialist @ Cisco Meraki.**

* Currently compatible with Cisco Meraki software only.
