

TAKE BACK CONTROL OVER YOUR MERAKI USER BASE

Allowing everyone in an organization to have the same access permissions can open the door to big trouble.

Why risk it?

Boundless Access Control offers you more granular role-based access control for the Meraki dashboard, and lets you grow your network infrastructure efficiently and without frustration.

FLEXIBLE ROLE-BASED ACCESS CONTROL

Minimize the chance for **networking risks and errors**

Keeping things simple often requires limiting options. This is the case for Meraki's role-based access levels, whose limited granularity could eventually result in:

- **Data breaches** - users can get unauthorized access to sensitive data.
- **Network breakage** - users can perform unpermitted changes by mistake.

With Boundless Access Control you can mitigate these risks by choosing the exact menus a user is authorized to view and modify, and restricting access everywhere else.

ADVANCED BULK USER MANAGEMENT

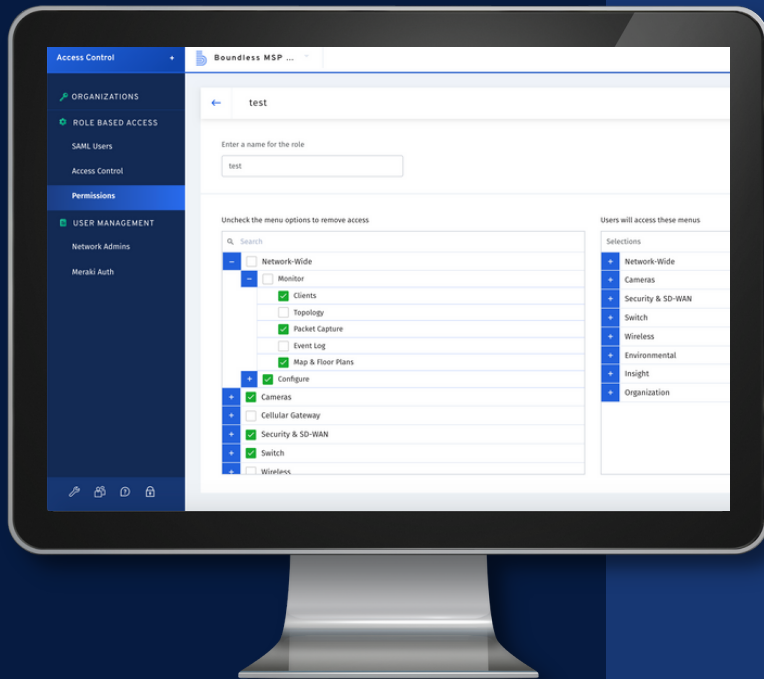

Get rid of the grunt work **as your infrastructure grows**

Boundless Access Control centralizes your entire Meraki user base, and enables you to simply add or remove hundreds of admins in bulk.

It offers dynamic user visibility and management across all your Meraki organizations in a single pane of glass, helping you handle your user base more efficiently, and letting you focus on the tasks that matter.

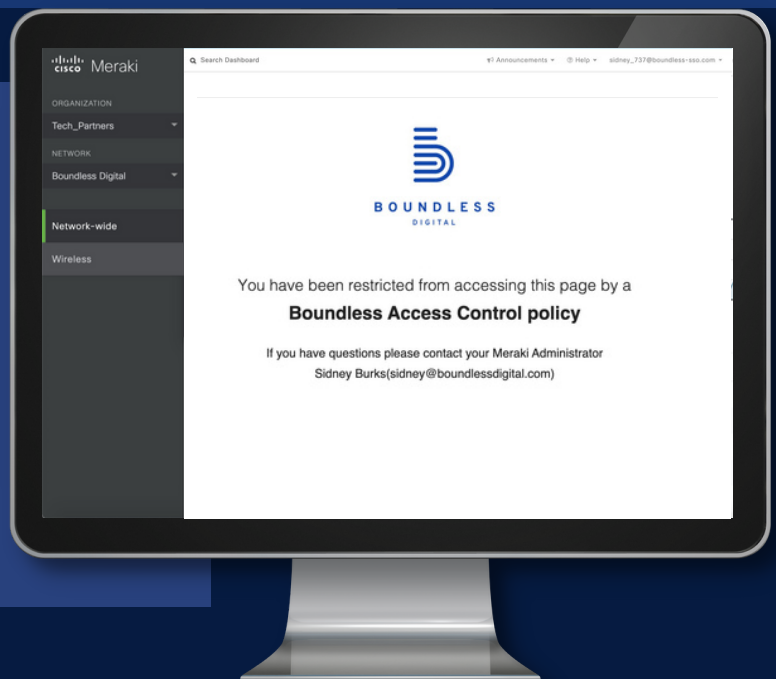

FAST TO CONFIGURE AND DEPLOY

Delegate access easily and reliably

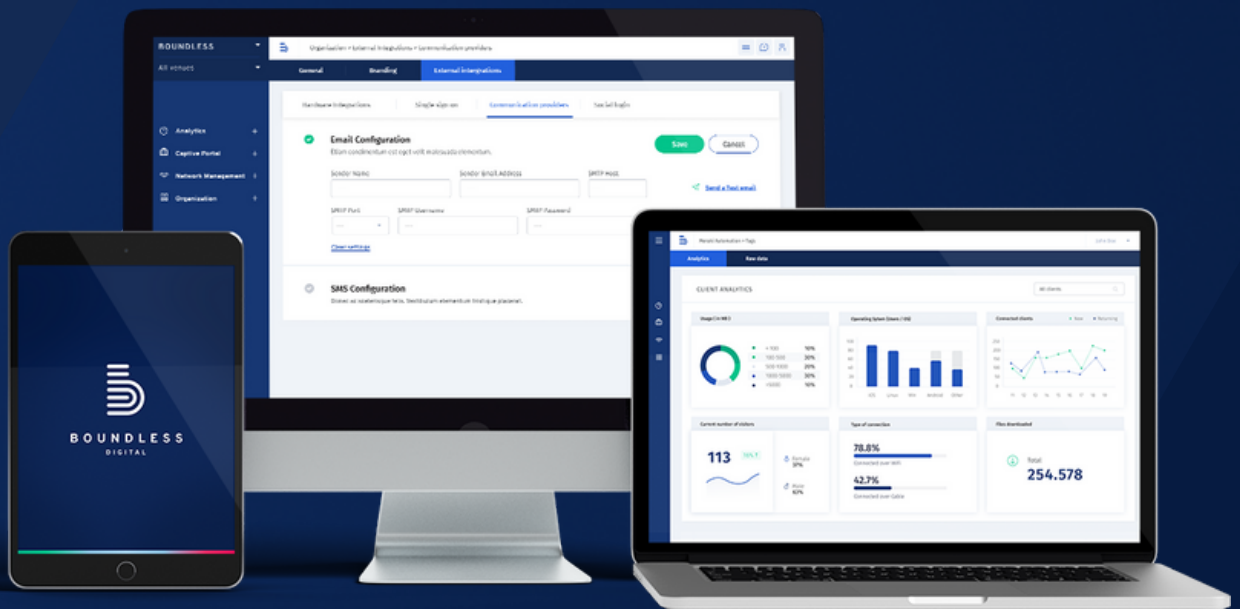

- **Create an Access Control List (ACL)** and specify which dashboard sections or menus will be accessible for an organization, network, and Meraki template.
- **Assign your ACL to the users of your choice** - this will automatically convert them into SAML users and limit their access to the Meraki dashboard.

- **Your users can now connect to the Meraki dashboard using Boundless SAML credentials,** and the Boundless web extension will enforce the designated restrictions.

RELIABLE TECHNOLOGY TO EMPOWER THE MERAKI COMMUNITY

With over 7 years of experience developing applications for Meraki, and 6 products available in the Meraki marketplace, **Boundless Digital** has proven to be a reliable technology partner and a true Meraki expert.
