The Advanced Captive Portal Solution
for Campus

BOUNDLESS
DIGITAL

Schools, universities, and other higher education campus regularly receive a high number of visitors. Whether they are students, employees, or external contractors, these visitors will often require to connect their devices to the WiFi network.

To provide a best-in-class Guest WiFi experience to each of them, education organizations must have a reliable and advanced captive portal solution that responds to their needs. A solution just like Boundless Guest.

Welcome the next generation of
CAPTIVE PORTALS

Simplified Deployment

Rapid deployment, with no need for software or hardware installation.

Intuitive Management

Streamlined workflows, easy-to-use dashboard interface.

Centralized Platform

Facilitate and speed up the administration of multiple networks.

Role-based Access Control

Encourage collaboration with role-based access control.

Data Security Compliance

Data collection and storage in compliance with the GDPR and CNIL.

Scalable Technology

Cloud-based infrastructure to overcome hardware limitations.

Flexible WiFi QoS parameters

- Avoid bandwidth saturation by easily managing the total upload and download bandwidth per user.
- Define a maximum connection time, in all simplicity and with wide flexibility.
- Determine when users can access your Guest WiFi, and even add-in break periods.

Multiple sign-on methods

- Extensive offer of sign-on authentication methods, including Guest Form, SMS and Social login, Ticketing Codes, Voucher Codes, or Sponsoring.
- Advanced authentication system that connects to the organization's Active Directory service to allow user automatic authentication via LDAP or other SAML identity providers.
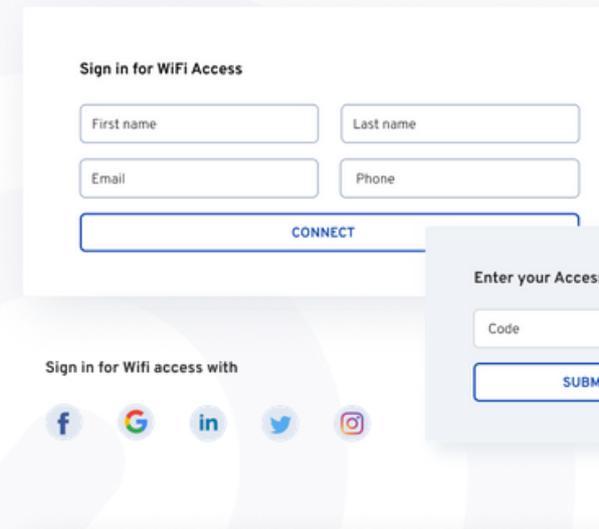

## Customizable Splash Page builder

- Deploy Splash pages within minutes thanks to its built-in drag and drop page builder.
- Fully customize the portal with your own branding and content.
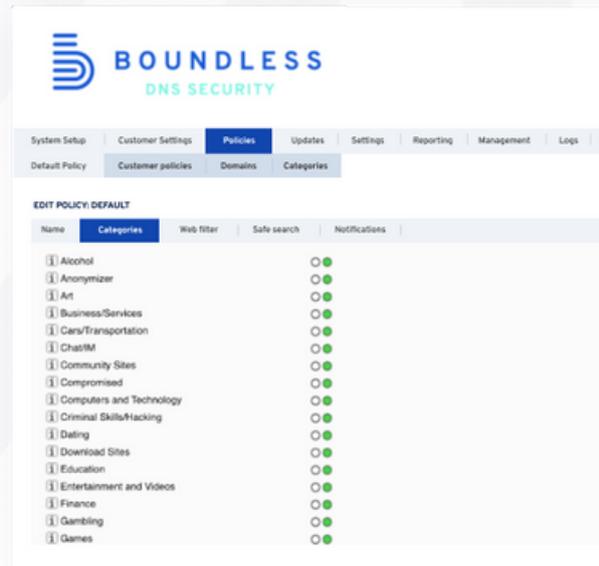

WiFi security and log storage

- Protect your Guest WiFi by easily applying web filters to control the content that user can access from your network.
- Define different policies for different user profiles, such as employees, students, or visitors.
- Aggregate and preserve traffic-related activity logs from your WiFi in compliance with the GDPR.

Boundless Guest seamlessly integrates multiple technological vendors, such as Cisco Meraki, Aruba, Extreme, Zyxel, Huawei, Ubiquity, Ruckus, and more.
